Art Unit: 3653

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-10, 12, and 14 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. There is no disclosure as to how "introduction of the particles into the fluid occurs in a particle size-dependant manner at different locations along the relative direction of movement, such that larger particles are introduced closest to the collecting means with regard to the horizontal direction component in said relative direction of movement." While similar language is included in the disclosure there is no explanation of how this is actually achieved. Only a ramp 6 is shown as an input and it is not clear how this can achieve the claimed function. There is no direction provided to actually achieving the claimed feeding of particles. Although examples are included it is not clear which if any information pertains to the limitation in questions. Additionally the indefinite nature of this limitation (as addressed below) makes it much more difficult or nearly impossible to achieve as it is not clear what one practicing the invention actually needs to do.

Art Unit: 3653

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-10, 12, and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim language "wherein introduction of the particles into the fluid occurs in a particle size-dependant manner at different locations along the relative direction of movement, such that larger particles are introduced closest to the collecting means with regard to the horizontal direction component in said relative direction of movement" renders the claims indefinite. It is not clear what is actually required by this limitation or how the particles are actually arranged or spaced out upon being fed to the fluid. Prior art has not been applied at this time as it is not possible to discern the broadest reasonable interpretation of the claim at this time. Examiner notes that upon clarification it may be the case the Eder reference still anticipates or renders some of the claims obvious.

Response to Arguments

- 5. Applicant's arguments with respect to claims 1-10, 12, and 14 have been considered but are moot in view of the new ground(s) of rejection.
- 6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3653

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Hageman whose telephone number is (571) 272-3027. The examiner can normally be reached on M-F 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Saul Rodriguez can be reached on (571) -272-7097. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
